

In order to do a background check, the referee must have FYSA listed as the primary assignor in the account. If a referee is unable to do a background check, the most likely cause is that the Primary assignor has been changed to someone other than FYSA. While in the Referee account, select the Referee Assignors tab. The Primary Assignor is identified. If that is not FYSA, then find FYSA on the list of Associated Assignors, and press the make primary button.
