

The process of moving a game date is easy. While in the Applicable event league scheduling controls, once the game has been placed on a field, put the cursor on the game, and right click. A Box will open, and the details of the game will appear. The date can be changed, as well as the time, and then press save and the date will be changed. Go back to the date you moved the game, and slide the game into the field as you did the others (this eliminates the error of having a 2 AM game, or one that lasts 10 hours)

Put the cursor on the game in the chart, right click the mouse, and the box opens.

Clubs and teams cannot change home and away, but if teams want to switch their home and away games, Just change the dates of your home game. When both clubs do this, those games are now changed.

If any one needs any help with this process, please email Linda at llathro1@gmail.com or Sheri Doback at sheridoback@verizon.net.
